Representative Transformation Case Studies

Real Challenges. Practical Solutions. Measurable Results.

*Delivering technology solutions
that make a difference.*

State Agency Application Modernization

Rebuilding critical applications for greater efficiency and public service.

THE CHALLENGE

Aging legacy applications with limited maintainability, manual processes and restricted access.

WHAT JID DELIVERED

Modernized the application using Microsoft technologies, implemented secure cloud infrastructure, and streamlined workflows.

THE RESULTS

35%

reduction in manual processing

- Reporting time reduced from weeks to days
- Improved availability for remote staff

KEY TECHNOLOGIES

.NET | Azure | SQL Server | Power BI

Intelligent Process Automation

Automating document-intensive processes with AI and RPA.

THE CHALLENGE

Manual document processing was time-consuming, error-prone and delayed business operations.

WHAT JID DELIVERED

Implemented an intelligent automation solution using UiPath and AI to extract, validate and route information.

THE RESULTS

60%

reduction in manual document processing time

- Higher accuracy
- Faster turnaround
- Improved productivity

KEY TECHNOLOGIES

UiPath | AI/ML | Azure | .NET

Enterprise ERP Transformation

Aligning finance, procurement and operations for a stronger, more efficient enterprise.

THE CHALLENGE

Disconnected systems and manual processes created reconciliation issues and limited visibility across finance and procurement.

WHAT JID DELIVERED

Provided functional and technical expertise to implement and optimize enterprise ERP solutions, aligning business processes and data.

THE RESULTS

- Improved financial reconciliation
- Greater data accuracy and visibility
- Streamlined procurement processes
- Enhanced audit readiness

KEY TECHNOLOGIES

SAP | Oracle | PeopleSoft | Integration

Modernizing Capital Project Budgeting for a Multi-Campus Energy Concessionaire

A cloud-based transformation that brought visibility, auditability, and governance to 16-year capital plans across multiple campuses.

THE CHALLENGE

- Budget data for each project spanned 16 fiscal years, tracked across wide, error-prone spreadsheets.
- Cost calculations were buried in code with no visibility for non-technical users.
- Each campus required its own approval process and governance.
- Desktop application limited collaboration and created security risks.

THE SOLUTION

- Cloud-based platform with role-based access and real-time collaboration.
- Normalized, validated data model for 16-year budget entry and reporting.
- Workflow-driven approvals and Board of Trustees review.
- Transparent, step-by-step waterfall cost calculation engine.
- Secure, web-based access for all campuses.

THE RESULTS

- Real-time collaboration across the full planning team
- Full auditability of every budget calculation
- Consistent, campus-specific reporting from live data
- Formalized governance workflow
- Eliminated security risks from distributed desktop applications

JIDOps

Enterprise Operations Platform

One Platform. Total Visibility. Greater Control.

THE CHALLENGE

Growing service organizations often manage customers, projects, employees, timesheets, invoices and financial information across disconnected applications and spreadsheets.

THE SOLUTION

We designed and developed JIDOps as a unified enterprise operations platform, bringing core operational workflows into a single, integrated environment.

THE RESULTS

- Unified operational visibility
- Connected workflows across the business
- Real-time dashboards and reporting
- Improved efficiency and control
- Built on modern, scalable technology

Built for Your Operations. Ready for What's Next.
